

GreyStream - media player for Samsung Smart TVs

GreyStream is media playback software for Samsung televisions running Tizen 6.5 and newer, broadly sets from 2022 onward. We operate strictly on a Bring Your Own Content (BYOC) model: you supply the media sources, GreyStream supplies the player. No channels, films, series or media subscriptions are included at any price.

Radio player + visualiser	12-Month Premium Software Licence (1 device)	36-Month Premium Software Licence (1 device)
\$0.00 free to use • Search radio directories and services • Up to 50 of your own stations • Up to 5 radio playlists (M3U) • Visualisers, backgrounds, artwork and lyrics • Favourites and search. No account, no expiry	\$6.99 / 12 months Regular price \$9.99 • Software licence only. Media and channels are not included • Live, film and series playback from your own sources • Up to 10 saved media sources • Now and next, search, continue watching • Includes the full Radio experience • One payment for 12 months. No automatic renewal	\$17.99 / 36 months Regular price \$24.99 • Software licence only. Media and channels are not included • Everything in the 12-month licence • One payment for 36 months on one television • No automatic renewal

"Regular price" is what Premium will cost once the launch period ends. It is not a former price and has never been charged.

Premium comes with a 14-day trial that needs no payment card. One television per Premium licence. Radio is free on as many televisions as you like, with no account and no expiry. Prices are in USD and inclusive of applicable tax where GreyStream is permitted to sell. BTCPay Server fixes the BTC amount when an invoice opens. Card payment through a Merchant of Record is scheduled. A GreyStream licence buys the software and its features only.
